ABSTRACTED-PUB-NO: AU 8824964A

BASIC-ABSTRACT:

The transportable reinforced concrete floor slab is of rectangular shape having a length between 4.5 metres and 13.0 metres and a width between 3.0 metres and 4.5 metres. There are two longitudinal beams and two end beams along the perimeter of the floor slab.

The longitudinal beams and the end beams are integral with the floor slab and reinforced throughout their respective lengths by at least two non

tensioned
reinforcements positioned in each respective beam. One such
reinforcement is
located in the top half of each beam and another is located in the
bottom half
of each beam.

ADVANTAGE - EAs of mfr.
